## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1, lines 24-39, requires further clarification to describe the features of the Applicant's claimed invention in a more straightforward manner.

Claim 1 recites the following limitations: "means for associating the pivot in rotation," "the opening," "the margin," and "the diameters." There is insufficient antecedent basis for this limitation in the claim.

In claim 5, it is unclear if the "means for turning said pivot" refers to the same feature addressed as the "means for associating the pivot to turn" or the "means for associating the pivot in rotation."

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 5, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Bolger et al. (US Pat. No. 6,770,096). As best interpreted by the examiner, Bolger et al. discloses the following of the claimed invention: a block (1); anchor members (3) with a

Art Unit: 3774

pivot (2) and blades (10, 11); means for mounting the pivot comprising a hole (opening on element 5), a slot (opening on element 5'), and a common portion (4); the anchor members having a first position (please see Figure 4) and a second position (please see Figure 5). The means for turning the pivot include the bar of element 2, located on the right side of Figure 2. Please see the figures below for the rest of the claimed features of the invention.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bolger et al. in view of Ferree (US Pub. No. 2005/0261773). Bolger et al. discloses the invention substantially as claimed, however, Bolger et al. does not teach the second bearing as a cylindrical retention bearing. Ferree teaches a spinal prosthesis with a cylindrical retention bearing in paragraphs 0032-0034 for the purpose of better holding its associated mobile member in place. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of

Bolger et al. by using a cylindrical retention bearing in order to better hold the anchor members in a particular position.

### ***Claim Objections***

Claims 6 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
